

CUTTING SERVICES

4TH AXIS MACHINING

CNC Routing
Machining
Prototyping
Light Engineering

Keeping your projects on the move

Machinable Materials

- MDF (MEDIUM-DENSITY FIBREBOARD)
- PLY WOOD/FORM PLY
- SOLID TIMBER
- CFC (COMPRESSED FIBRE CEMENT).
- COMPACT LAMINATES
- PVC BOARD
- ACRYLICS
- CORIAN / SOLID SURFACE
- ACM PANEL (ALUMINIUM COMPOSITE PANELS)
- ALUMINIUM PLATE

AND MORE!

Technology at work for you

CONNECTING YOUR BUSINESS TO THE TECHNOLOGY RESOURCES YOU NEED

4th AXIS Machining Pty Ltd family owned and operated was created solely for the main purpose as a cutting service, located in Bibra Lake, WA.

Being able to aid in the design process & utilizing most common CAD based programs we are well equipped when theory & design meets productivity.

We can manufacture a majority of dynamic components/parts that are out sourced by engineering companies ie. Concrete molds, jigs & shapes that are used to form concrete structures, architectural builds or for logistic purposes.

Our capabilities in cnc routing & drilling has an extensive reach when it comes to 2d (flat panel machining) or 3d (relief and profile machining) if we are unable to assist for what ever reason we will point you in the right direction.

flexible solutions for your business needs

PRODUCTION TIMES & DEMANDS TO SUIT YOUR COMPANIES REQUIREMENTS

ACCURACY & TOLERANCES

Our cnc machines give us the ability to have tolerances within 0.1mm, all parts are checked by QC, labeled & packed ready for pick up or delivery. 24hour emergency turn around time can also be utilized depending on the complexity of the design and machine time.

CAD/CAM

4th AXIS Machining is equipped with the CAD capability to interpret all your cutting requirements, together with the cliental project storage service, will enable you to easily repeat an order and eliminate programing time passing the savings on to you.

- .DWG
- .DXF
- .EPS
- .STL
- .SKP

WHAT TYPE OF MACHINING

Flat panel or known as 3 & 4 axis machining, this includes various types symmetrical patterns, shapes, drilling and pocketing, we are not able to machine steel.

WHO USES OUR SERVICES

A large portion of our customers are - precast concrete suppliers, steel fabrication & engineering, logistics, builders, architects, aluminum fabrication, oil & gas, mining light engineering.

COMPANY INFO

- 2000m2 storage yard
- 800m2 workshop facility
- 3x CNC Machines etc.
- 6x staff full time minimum
- 4.5t flat bed truck
